# THE PRESIDENT'S LETTER

By Lee Kensinger, president 2017 Friends of Tamarac National Wildlife Refuge

Fall is here! It is the time of year that nature displays its artistry. The maples, oaks, aspens, and tamaracks paint unparalleled displays of color. Some of our resident birds are leaving, and some of our visiting birds are passing through again on their way south. The white tailed bucks are

polishing their antlers in hopes of getting their chance to continue the species. Fall is truly my favorite season of the year.

The Friends of Tamarac start their work in the fall. The Toast to Tamarac was a great success. Thank you to all who participated with planning, donations, and their presence. The Toast is an event that promotes fun, friendships, and funding. If you didn't attend this year, we hope that we see you next year.

The Friends of Tamarac show their best colors through environmental education for children. Our school programs start up in the fall and continue through the winter and spring. Grade schoolers come out and see the changes in Tamarac through the seasons. Helping kids connect with nature is the best thing that we do. It is our mission, and we strive to do it well.

In our continuing efforts to bring kids to nature, we are in need of more caring people that love nature and would like to share that with children. To make our kids' programs work, we need people who are willing to be at Tamarac when the children arrive, not only to help with things such as directing them to the bathrooms and buckling snowshoes but also to answer questions as they explore nature by walking on the trails and partaking in the programs led by Tamarac employees and trained volunteers. You can be that person, a person who makes a difference by enabling children to experience the outdoors.

Thank you all for supporting the Friends of Tamarac.

Tamarac Tracks is a publication of the Friends of Tamarac serving both the Friends and the Tamarac National Wildlife Refuge. Tamarac Tracks is published four times a year, mailed to members and made available as an electronic PDF on our website. Please discuss article ideas in advance with the newsletter coordinator (jyjacobson@arvig.net).

# FALL IS FOR MAKING MEMORIES

By Neil Powers, Tamarac Refuge Manager

I vividly remember one specific fall day from my early childhood. It was my first duck hunt with my dad; it was just the two of us traveling the countryside in search of a duck-filled pond that we could “jump-shoot.” I remember pointing out every bird and water dwelling critter in the hope that my dad would positively identify them as ducks. As luck would have it, we found a small pond that

contained four ducks, surrounded by thick grass and encircled by a standing cornfield that would conveniently hide our approach. Crawling on hands and knees through the cornfield, we reached the edge of the pond. On queue, we stood up and flushed the birds in easy shot gunning range from our hiding spot. Three rapid shots later and two ducks were in the bag.

This memory replays itself every fall as my sons prepare themselves for the hunting season ahead. They are, by all accounts, “diehard” duck hunters, and while extremely proud, I fear (in a good way) that I have created a monster(s). I’m certain they could be caught daydreaming in school about duck hunts past and those to come. However, I feel fortunate that Minnesota’s bountiful natural resources have afforded us such opportunities to experience the beauty of an early morning sunrise rise and the grace of ducks maneuvering across the sky. I guess you could say that I, too, have been “hooked” for a long time.

Fall has arrived in Minnesota, and the refuge offers an excellent opportunity to experience the outdoors and make some memories of your own. Whether you’re interested in viewing the fall colors, casting a line, or decoying ducks, I encourage you to bring along a youngster so that they, too, can “get hooked on the outdoors.”

---

## FRIENDS OF TAMARAC MEMBERSHIP RENEWAL UPDATES

Membership will now be tracked monthly instead of annually. Starting with our 2018 membership renewals, a member will receive a reminder a few weeks before their membership is set to expire. Another email or card will be sent a month after expiration, depending on the member’s preferences to receive emails. Please contact us at [info@tamaracfriends.org](mailto:info@tamaracfriends.org) to ensure we have your correct email address. Become a LIFETIME member for \$500 and no renewals are needed!

# DEER HUNTING & LEAD

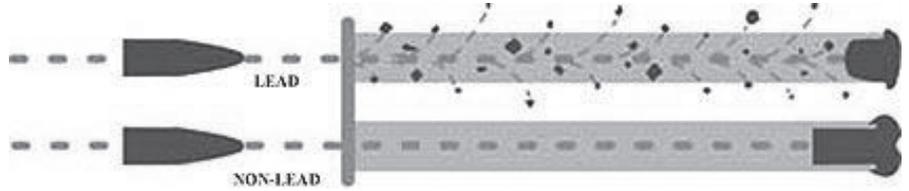

## Be Part of the Solution!

Lead poisoning is a serious problem for both wildlife and humans, but it is easily prevented.

During this year's hunt, we encourage deer hunters to use lead free ammunition. Tamarac National Wildlife Refuge is one of several refuges in the Midwest Region encouraging hunters to make the switch.

Historically, lead has reached us in a number of ways—through gasoline, paint, a variety of manufacturing processes, and in ammunition. As our awareness of the dangers of lead grows, we seek out better alternatives. Unfortunately, the toxic legacy of lead continues to harm wildlife.

Bald eagles are present at Tamarac Refuge during the deer hunting season and eat carcasses and gut piles. Each year across

the midwest, thousands of gut piles from field dressed deer are left in the field. When those remains contain lead bullet fragments, eagles may eat lead. Once lead enters the bloodstream, it damages a bird's nervous system and paralyzes its digestive tract. Without immediate medical assistance, poisoned birds can starve to death or become weak and easy prey. A grain of lead the size of a piece of rice can be lethal to a bald eagle.

We encourage you to switch to lead free ammunition and be our partner in this conservation effort. Together it is our goal to protect wildlife health on our national wildlife refuges.

Many lead free ammunition choices are available for various types of guns and we encourage you to explore your options:

Visit your local sporting goods store and ask for lead free ammunition. Know what brands and bullet models are available before going to your local store.

Check this website for more information on finding specific ammunition.

<http://www.huntingwithnonlead.org/>

- In general costs for lead free ammunition are only slightly higher and not a significant increase to the overall cost of hunting deer.
- Remember to sight in your gun and practice with the new ammunition before you use it in the field.
- This is a voluntary program. Our wildlife conservation efforts will only be successful with your support. Tell your friends and family that you've made the switch to lead free ammunition.

"Setting a good example of conservation is important to me and my family. That's why we're choosing to use lead free ammunition on our deer hunts." Mike & Denise Warweg, Rochert, Minnesota, Avid deer hunters on Tamarac National Wildlife Refuge.

Kathy Cole receives her America the Beautiful – The National Parks and Federal Recreational Lands – Senior Lifetime Pass from volunteer John Hovdenness just in time before the cost of the pass jumped from \$10 to \$80.

## Senior Pass Frenzy

By Kelly Blackledge

On August 28, 2017, the price of the America the Beautiful – The National Parks and Federal Recreational Lands Senior Pass increased for the first time since 1994. The lifetime Senior Pass increased from \$10 to \$80. Why \$80? The legislation states that the cost of the lifetime Senior Pass should be equal to the cost of the annual America the Beautiful – The National Parks and Federal Recreational Lands Pass, which is currently \$80. The additional revenue will be used to enhance the visitor experience in parks and refuges.

The rush to get a pass at the lower price created quite the frenzy at the Visitor Center. In 2016, only 6

passes were sold through the whole year. By the end of August we had sold 639 passes. Nearly all of those were in August. The Visitor Center was a busy place. We had our highest number of visits in one day, without a special event, on August 25 and 26. Once we had plenty of cards on site, we used social media, the radio, and the newspaper to get folks out the refuge. Most people, I would guess 90%, had never been to the refuge before and didn't realize there was a Visitor Center. Some drove 20 minutes, others 2 hours. The Friends gift shop made record sales, gained new memberships, and the Friends donation box filled up.

The busy days and hard work of the volunteer hosts paid off. Tamarac Refuge will be able to keep nearly all the funds generated by the senior pass sales that were made on-site. Those funds must be used for visitor experience enhancements.

# A TOAST TO TAMARAC 2017

Start with a perfect fall evening, add great live music, delicious food and wine, and you are at the Toast to Tamarac 2017. The David Ferreira Trio provided wonderful music for over 200 guests who came to the Richwood Winery for our 7th annual fundraiser for Friends of Tamarac. Most of the food offered was locally sourced and donated. After enjoying wine and food, the revelers competed in some silly games. The winners went home with tubs of nature-themed beer. The Winery presented a door prize of a basket of their wine and goodies. A very large and unique silent auction was offered to guests. Our local artists' works were favorites. As the sun went down, we returned home grateful to our donors and volunteers for another successful Toast.

# CONCORDIA STUDENTS FROM KEN FOSTER'S ENVIRONMENTAL POLICY CLASS

assisted with fall education programs again this year. Here's what some had to say about their experience.

"I have realized that educating people about the environment is both exciting and incredibly rewarding"

"..it was not only a learning experience for them (the students) but it was for me too."

"It was a fun time overall being outside and seeing the kids get out of the classroom and enjoy the outdoors as well."

"..what surprised me was how experiences such as volunteering at Tamarac helped re-instill the appreciation I have for the outdoors."

"I can see how the experience outside the classroom and in a natural environment can be impactful for the students for how they shape their relationship with the environment."

Each time students visit they are given a Tamarac Field Journal to document the things they see, hear, smell and learn about nature. Here's what Carter, a third grader from Detroit Lakes, wrote about his Fall discoveries.

"When your on a trial you can see all kinds of exiting stuff! And if your quiet enough you will find some interesting stuff like animals and different kinds of plants. Its pretty fun!"

# FIREFIGHTING DETAIL FROM TAMARAC

BY GINA KEMPER

We were sent to Buffalo, Wyoming, for a 14 day detail to assist the BLM and were involved with the initial attack on 5 separate wildfires. It was interesting and impressive to see how the communities came together to assist with fire fighting. I saw a rancher's kids who were 12 years old; they were manning a hose to put out fires right next to us. Communities are big supporters of their firefighters, provide meals, and donate supplies. In this small town, the surrounding communities brought 3 sixteen-foot horse trailers full of supplies for the firefighters. It was overwhelming to see such an awesome outpouring of support. I love firefighting. I love to help people who are in need. I know it is hard to leave my family back home; some may frown on that. But I look at it as a way to set an example for my children; helping and doing good for others is truly a blessing and a reward. I am grateful for the opportunity to serve where and when I can!

---

## SWAN PARTY

Trumpeter Swans begin to gather in large numbers in the fall. Flat Lake and Blackbird Lakes are great places to view this pre-winter migration. Upwards of 500 swans have been seen this year on Blackbird Lake. Trumpeter swans in Minnesota generally only migrate to central or southern Minnesota or nearby states to overwinter, but some of the reintroduced birds have been documented wintering in scattered locations as far south as Arkansas, Kansas, Missouri, Oklahoma, and Texas. There are always a few hearty birds that can be seen on the Ottertail River through the winter months. Round Lake outlet on Hwy 37 and Height of Land Lake outlet on West H.O.L. Road are areas to watch for swans in winter. Other local places include the channel between Little and Big Floyd Lakes and Dunton Locks. Any place there's open water could be a good winter hang out for these large birds.

# 2017 VOLUNTEER OF THE YEAR

## Charlie Leitheiser

Last year's award winner Ken Mattson presents the 2017 Volunteer of the Year award to Charlie Leitheiser

This year's volunteer of the year has played many roles over many years. In the "early days," he spent a lot of time mowing, picking up litter and clearing trails. He was also a visitor center host taking care of weekend operations. In the fall he was always eager and happy to do early morning car counts for both

deer and duck openers. He has been a "regular" at the deer check station; welcoming hunters and sharing stories. Every April, we know we can count on him to put in a whole day of picking up trash. He must really enjoy it as he travels all the way from Moorhead! In 2012 he took on another role as a member of

the "A" Team- a newly organized group of volunteers dedicated to educating refuge anglers on Aquatic Invasive Species. He's definitely a "morning person" as he is out at the Tamarac Access as early as 6:30! His knowledge of the refuge, his sense of humor and calm demeanor make this a great fit. In the last couple of years he has worked with Cathie Ferguson to coordinate the program which includes scheduling and filing reports to the refuge. Since 2012, he has donated over 375 hours to the AIS program. LE officers Brent Taylor and Chuck Melvin enjoy visiting with Charlie and appreciate his presence at the lake accesses. Tamarac is so fortunate to have such a special relationship with this volunteer for 34 years! Though he has a very busy life outside of the refuge, he always finds time for Tamarac. Congratulations to our 2017 Volunteer of the Year, Charlie Leitheiser.

## CELEBRATING VOLUNTEERS

By Janice Bengtson

Volunteers showed their 'team spirit' at the 2017 Volunteer recognition picnic. Many wore their favorite team jersey or apparel including a vintage Larry Bird jersey worn by Don Allen. Over 60 people joined us to celebrate volunteerism on the refuge. In 2017, 200 volunteers donated 7,068 hours of service in various areas including maintenance, wildlife and habitat projects, environmental education and more.

One of the many special highlights was Dave Schnieder receiving the Unsung Hero Award. This past year Dave donated over 100 hours towards environmental education. His enthusiasm is contagious with children – as this comes through with every game or hike he leads. He is the game guru, playing Fox and Rabbit, and Hidden Hazards. During the winters, he has been the Snowshoe Ninja- leading one snowshoe hike after another-up to 5 in a row! We appreciate Dave's easy going manner- if schedules get off a bit, he adapts which must come from his 40 years of teaching experience. Dave also quietly works on behalf of the Friends to raise money for the education program. Dave's dedication to the refuge and to children of this community is truly commendable.

# CONSERVATION CAN BE A **BLAST!**

By: Olivia Walton

The booming voice of our resident wildlife biologist, Wayne Bringer, can be heard resounding through the dense pines: “Warning, there is going to be an explosion!” Shortly after the fair warning, chunks of wood, rocks, and water soar sky-high as a beaver dam is cleared from a plugged stream, sending a wave of water to hydrate parts of the wetland that have been dry for months. A crew of hard-hat donned biology technicians stand near Bringer with dropped jaws; they weren’t prepared for what a blast conservation could be!

An explosive may not be the first device that comes to mind when you think of effective conservation tools, but at Tamarac National Wildlife Refuge (NWR), they are utilized for beaver dam removal, a form of habitat management. In a natural system, the water movement would fluctuate with the seasons throughout the system, but enter the industrious beaver. *Castor Canadensis*, the largest rodent in North America, builds dams to improve their habitat, creating deep pools where the water levels remain stable. The problem arises when these dams prevent the natural flow of waterways, which is detrimental to critical vegetation communities downstream.

Beavers are also a part of the natural system, but without adequate predators, beaver numbers and the occurrences of dams have increased beyond natural and historical levels.

Beaver dam removals--only those obstructing critical waterways-- are usually conducted on the refuge twice a year. In early spring, dams are removed in preparation for the vegetation growth and migratory visitors during the summer. The water levels are assessed in the fall as well; the removal of beaver dams during this time of year is in preparation for the winter snowfall. If beaver dams retain too much water in one place on the refuge, once the snow and ice begin to melt, heavy flooding can result. Contrary to popular belief, beavers do not live in the

dams they construct, and the process of removing the dam is not geared towards removal or injury the actual beavers.

The stability and health of the aquatic ecosystems are imperative to the future goals of Tamarac NWR where we seek to provide “migratory bird benefits while emphasizing restoration of historic vegetation patterns and ecological processes.” The removal of beaver dams preserves the water levels and flow rate needed to support the growth of vegetation and maintains a food source and habitat for waterfowl. This management technique has had great success preserving the wild rice crop, which has a cultural significance within the tribal community. Wild rice is a cherished staple in the state of Minnesota and provides an essential food source for the diverse waterfowl species found on Tamarac NWR.

---

Thank you to all the volunteers, partners and participants to the Tamarac Fall Festival. The day was beautiful and there was a wealth of fun information about how to keep our habitats healthy.

# FALL ACTIVITIES ON THE REFUGE

**Blackbird Wildlife Drive:** Take a drive on this five mile interpretive route following the edges of lakes, marshes and meadows. The swans are gathering on Blackbird Lake and the canopy of trees is spectacular. Pick up a brochure at the information kiosk located at the start of the Drive on Hwy 26.

**Old Indian Hiking Trail:** Follow in the footsteps of the Ojibwe people and experience the beauty of the maple basswood forest on this 2.4 mile loop trail. Mushrooms, lichens, mosses and colorful leaves make this a beautiful fall hike.

**North Country Trail:** Hike a portion of this 4600 mile National Scenic Trail as it traverses the refuge through a variety of habitats. Access on 400th Ave., Blackbird Wildlife Drive or Pine Lake Parking Area on County Hwy 29 or at the Discovery Center.

## **National Wildlife Refuge Week October 9-15**

Visit the Detroit Lakes Washington Square Mall to see all the Tamarac Photo Contest entries on display. Cast your vote for People's Choice! You'll also be able to purchase a chance on the beautiful Wildlife Quilt that the Friends of Tamarac are offering as a raffle fundraiser. Photo Contest Awards presentation on Sunday October 15 at 2:00 pm at the mall.

## **Sunday October 8, 2:00 pm**

### **Movie: Leave it to Beavers**

Once valued for their fur or hunted as pests, beavers are seen in a whole new light. This film reveals the ways in which beavers transform and revive landscapes. These rodents are being recruited to accomplish everything from re-establishing water sources in bone-dry deserts to supporting whole communities of wildlife drawn to the aquatic ecosystems they provide. 55 min.

## **Sunday, October 15, 2:00 pm**

### **Movie: Living with Wolves**

Jim and Jamie Dutcher will share the story of living with The Sawtooth Pack of wolves in the wilderness of Idaho. Overcoming forest fires, marauding mountain lions, and sub-zero winters you'll see a unique partnership of human and predators. 55min.

## **Sunday, October 15, 2:00 pm – at**

### **Washington Square Mall, Detroit Lakes**

Photo Contest Award Presentation – award winners of the Tamarac Photo Contest will be revealed. Winners will be identified in each category of wildlife, plant life, scenic, recreation and natural abstracts. There were all be youth winners, people's choice and a grand prize winner.

## **Sunday, October 15, 2:00pm – at**

### **Washington Square Mall, Detroit Lakes**

Quilt Raffle drawing by the Friends of Tamarac. This will be the last chance to purchase tickets for the beautiful quilt created by Julie Warweg of Detroit Lakes, MN.

**Visitor Center is open 7 days a week through October 15th.**

Visitor Center Winter hours –

October 16—May 18: Monday-Friday 8:00 am—4:00 pm.

January—May - Monday-Friday 8:00 am—4:00 pm and the 1st & 3rd Sundays 10:00 am– 5:00 pm.

## **Thursday, November 30 - 5:30pm**

### **Friends of Tamarac Annual Dinner:**

Join us to celebrate the 25th Anniversary of Friends of Tamarac. We'll share a little history of how this group began and the many accomplishments over the years. We'll have a short meeting to elect new board members and approved by law update which will be available for review on-line [www.tamaracfreinds.org](http://www.tamaracfreinds.org). Please RSVP - 218-844-1767 - \$25 for dinner.
